## Standing Where the Towers Fell:

### A Study of Psychic and Physical Collapse and Reconstruction

**T**his talk examines the evolution of a research project in terms of the interplay between emerging clinical material, relevant literature, and the writing process. A profound terror of annihilation formed the nucleus of this case, and over the span of treatment, the patient began to contextualize death and move toward life. It addresses the author's experiences in conducting the analysis, with a focus on how the research process aided the analyst in the treatment of this primitive patient.

**Friday Evening. March 8th. 2013 7:30–9:30 PM**

CMPS, 16 West 10th Street, New York City

There is no charge for this event. Open to clinicians and the public
