Breakfast Seminar

Homophobia: Dead or Alive

Internalized homophobia impacts our clients in their lives and in the analytic office. LGBT clients report difficulties in forming relationships and suffer from depression, and a high incidence of substance abuse. This workshop will focus on identifying internalized homophobia as expressed through enactments and symbolic communication.

Andrés Hoyos, MS, LMSW is the Director of the Center CARE Recovery, a NYS OASAS licensed outpatient chemical dependence treatment program at the Lesbian, Gay, Bisexual & Transgender Community Center in NYC.

Participants are invited to stay for a tour and informational Open House following the workshop.

Modern Psychoanalysis rests on the theoretical framework and clinical approach of Sigmund Freud and the innovative techniques of Hyman Spotnitz and Phyllis W. Meadow. It aims to loosen repetitive and rigid patterns of thinking and behavior allowing for growth and maturation. This approach has revolutionized the psychoanalytic field and proven valuable to those working in social work, mental health, education, the law, business, and the arts.

The Center for Modern Psychoanalytic Studies (CMPS) holds an absolute charter from the State of New York to offer a Certificate in Psychoanalysis and is recognized by the State of New York as a licensure-qualifying institute for those seeking licensure in psychoanalysis.
